Cd-Rom's Golden Age?

WELCOME TO

INTERACTIVE QUARTERLY, the first magazine devoted exclusively to adult entertainment packaged on CD-Rom. We want this magazine to be a resource for you, a guide to what's best in adult entertainment, what is not the best, and why.

This is a young medium. CD-Rom today is at the stage where film was 100 years ago or TV was during its golden age. People are still influenced by *Potemkin*, the classic Russian silent film from the 1920s or even *I Love Lucy*. Who knows where the defining classic CD-Rom will come from?

CD-Rom publishers will try everything to intrigue and entertain you. Some you will embrace. Some you won't. Through the law of supply and demand, what works will become apparent.

The rules are still being written. The offerings span the spectrum from still pictures to movies presented at current motion standards to "interactive" disks and magazines on CD-

Rom. But very few disks are really interactive, despite what it says on the covers. Everyone is learning the technology. Expect radical changes in what you can do with CD-Rom, as the creative forces come to grips with technology. Then expect the inevitable shake out as everyone learns the aspects of marrying technology and creativity that sell.

Ultimately, you decide. Hopefully you'll let us know via letters or e-mail what you think of the contents of the silver disks you read about here, and whether you agree with us. We promise to help guide you with reviews, behind-the-scene features, some tech and a little humor. Onward!

Censor Alert

IF YOU LIKE ADULT CD-ROM, (and why else read IQ?) take heed. You're being screwed without benefit of orgasm. If you think you had problems buying erotic programming before, just wait.

Mainstream computer mags have thrown down the gauntlet in the world of adult CD-Rom. Most of the big distributors in an almost entirely mail order business received notice. Based "on a large volume of comments by readers and advertisers," said one, they were assigning ads for adult CD-Rom to a graphic free text ghetto in the back of their book. "Increasingly readers have complained," marks another. "Many have cancelled their subscriptions."

Now, any magazine has a right to control what ads run. This latter magazine, however, has the *cojones* to say "While this will affect the size and scope of your ads. . .(you) should continue to attract a strong pool of new customers." Uh, yeah, sure.

Our magazine, the first issue of *Interactive Quarterly*, takes pains to be

no more graphic than *Cosmopolitan*, but as this trend toward eviscerating ads for adult software continues, we may become the sole source for the juice and unabashed information on the subject.

We don't want you getting paranoid about the market disappearing. It's out there and you are not alone. When the VCR became a staple item in households across America. I was running a video store. About 40% of our business came from X-rated tapes. Adult CD-Rom, without the kind of wide spread distribution the videos enjoyed, accounts for nearly the same share of the market. Interactive Quarterly will tell you about it all, the good, the bad and the ugly, and do it in terms that wouldn't embarrass your mother. Too much. We hope you enjoy it.

Circle Reader Service #213

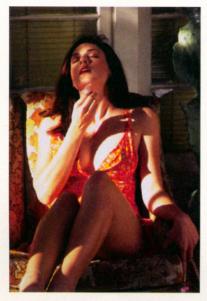

COMING TO A COMPUTER NEAR YOU

Some pretty exciting stuff is in the wings on adult CD-Rom. As the technology grows, so do the possibilities:

Dream Theater will be unveiling it's 30 FPS option soon. They've got several interesting projects on the burner, including The Misadventures of James Spawn, an R-rated, three disc game with hundreds of possible outcomes, full-screen graphics and 20 different characters, played by the likes of Ace Ventura actress Rebecca Feratti, Child's Play III's Dean Jacobsen and starring comedian Ted Davis.

"The way the game is designed," notes Digital Playground's Scott Taylor, "to finish playing it takes several hours."

In Digital Playground's Virtual Sex Shoot, you get to "chose the girl, choose her toy, and chose your own cam-

era angle," in making your own virtual erotic film. That game, due out in May, comes complete with a contest to see who can create the best movie using the product.

In the nothing succeeds like success department, Pixis International is readying a second edition of Space Sirens. Called Space Siren's II: Megababes From Ajia, it will send four more orientally oriented women into orbit, along with fans of the Asian space program. They are also readying Digital Erotica 3, the third installment of their erotic samplers.

On a similar front, MCI Communications and The Public Broadcasting Service announced a venture that would help digitize PBS programming, making it available on line and on CD-Rom.

Everybody wants to get into the Act

A bunch of new people are getting into the interactive act. Just before press time, a merger between two of America's wealthiest business conglomerates was announced, bringing together the trinity of Hollywood (Spielberg, Katzenberg and Geffen) with the wunderkind of computers, Bill Gates. The new company, Dreamworks, will focus on interactive adventures. stories and multimedia software for the home.

"The merging of storytelling and

technology," notes Spielberg, "offers an incredible opportunity to reach new

generations in ways that could not have been imagined a mere decade ago."

"Our partnership with Dreamworks," added Gates, "will pave the way for extraordinary new consumer products."

REQUIRED READING

Not long ago, I received a note sent to one of the larger mail order distributors of erotic (and, for that matter, non-erotic) CD-Rom material. The note distilled down to "I love your material, but my girlfriend doesn't. Please take me off your mailing list." Certainly, we support feminism (we're all married to pretty liberated women, here at IQ, 'cept for Theresa and Lori). Erotic material has always been a

dicey subject among feminists. One camp of feminists sets up booths on Madison Avenue with some particularly raunchy or exploitative images to get signatures on a perpetual anti-pornography petition.

Then there's the school of thought with proponents like Nadine Strossen, the current head of the American Civil Liberties Union. In her recent book Defending Pornography, she cites women who actually like erotica and the growing market of erotica geared toward women. But mostly, she argues this on a freedom of speech basis. She cites a Canadian anti-pornography law that has been used to ban works on lesbian, gay and even feminist themes. Fortunately, free speech continues to live and occasionally thrive in the US, (except in certain relationships).

Terror on the Internet

By the time you read this, the US Senate may well have passed legislation to abridge the guarantees of privacy and free speech on all electronic networks, including the internet. The bill, the "Communications Decency Act of 1995" (S.314), the brainchild of Nebraska Democrat J. James Exon, could shutter the smaller providers with stiff penalties not only for the people uploading the material, but for the systems that to which they upload it. An interactive petition circulated through various on line services reportedly got over

100,000 "signatures" (meaning over 100,000 people responded positively to the E-mail regarding this issue). However, image is everything in politics, and how good would it look to vote against anything called the "Communications Decency Act" in these days of high victorian morality?

Ironically, nearly everyone involved with the petition, and the bill, admits policing the net in the way the bill mandates would be nearly impossible. This is just another way your government is working for you and trying to excise government waste. For a copy of the petition, you can E-mail Alliancerequest@wc130.residence.gatech.edu.

Fear & Loathing in Adult CD-Rom

Watch for major retrenching in the adult CD-Rom business-and digital media for adults in generalas the government gets wind of what goes on and reacts. A new

Will this disc need labeling? Stay tuned.

porn labeling law, for example, has caused several manufacturers to start relabeling their titles. While Vivid Entertainment's David James is not worried, he says that he will

comply with the law, even if the legal challenge now being waged against unclear language in the law gets backed by the Supreme Court. According to James, the labels need to be part of the software, same as on video. When it comes into effect, the government has to be able to check an actresses ID, to be sure that at the time of the movie/ software's release she had passed her 18th birthday. Of course, if the filmmakers/software manufacturers win their Supreme Court challenge against vague language in the law, all this hooha would become unnecessary. The court should hear these arguments sometime this Spring.

William Milliam

the pursuit of

INTERACTIVE PL

THE TELEPHONE RANG. It was an irate boyfriend. Seymore Butts was in deep trouble.

"I had done this tape of this girl giving oral sex and having intercourse," Butts relates the occasional downside of his big-league status in the adult entertainment. "She had no problems. She was willing. But this boyfriend, who claimed to be the leader of a notorious motorcycle gang, said he didn't mind the oral sex but he didn't care too much for the scene where she got it. He told me he was willing to die for his woman and that if I was to damage the reputation of his woman, I would die, too."

Butts pauses a beat for effect. Would Seymore eat chrome and hot leather?
Naa.

"Having this woman's man call up and threaten my life was not worth it so I took care of it," says the erotic filmmaker. While not specific about how he 'took care of it,' he indicates that in situations like this, scenes can be cut or faces blotted out.

"Our stuff is based on consensual adult fun," Butts says. "We don't want to cause anybody problems."

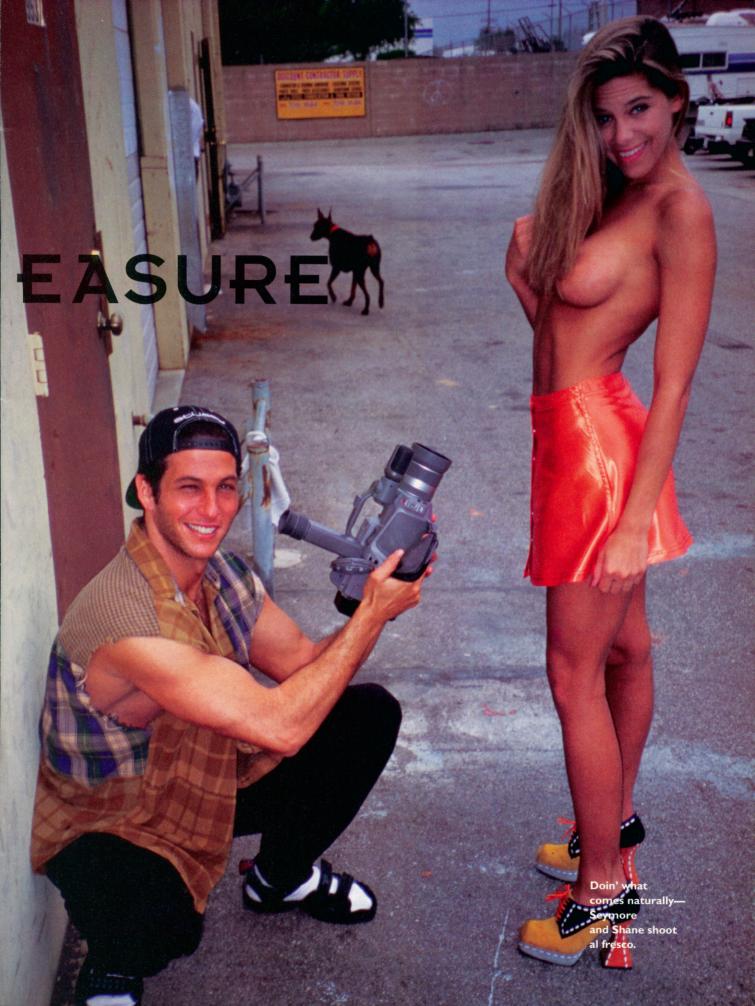

When he's not dodging irate boyfriends and husbands, street smart adult entertainment entrepreneur Seymore Butts lives up to his motto of good clean dirty fun. Over the last five years, Butts has pointed his all seeing lens at our ids to the tune of 16 adult video titles that have tickled our collective pleasure places.

Last year, the erotic filmmaker made the leap from videos to the new frontiers of cybersex. His virgin CD-Rom title, *The Interactive Adventures Of Seymore Butts* (New Machine), a raw and raucous romp through Mr.Butts neighborhood, pleased hardcore CD-Rom slots to the tune of 50,000 units sold.

Available this month, at better adult software outlets, comes the next interactive installment in Butts' electronic odyssey with his sexy sidekick Shane. Seymore Butts 2: The Pursuit Of Pleasure pushes the adult CD-Rom up the interactive evolutionary ladder. The disk presents the player/viewer with 127 ways to change the action with the click of a mouse.

"The CD-Roms are more fun to do than the videos," Butts' creative partner and frequent co-star Shane explains about starring in this new medium. "In *The Pursuit Of Pleasure*, there are more than a hundred ways to play it. You see

BY MARC SHAPIRO

something new every time."

that shifts from outright bragging to fetching humility, with an occasional side-trip into mob boss, Butts veers from amusement to mystification trying to explain his current status as top dog in the cutting edge, interactive adult entertainment universe.

"In all honesty, I can say I totally stumbled into this," says Butts of his surprising ascent to success in digital sex. "My video success, to a large extent, had been planned. This CD-Rom thing came totally by surprise. When I was approached to do the first CD-Rom, I had no idea what it was all about. I had no idea what could be done and I was not a true believer in the technology."

But if Seymore Butts' video career proves any-

thing, it demonstrates that Seymore Butts is a quick study. A scant five years ago Butts, an avid bodybuilder, found himself at the helm of a downtown Los Angeles gymnasium that was rolling nothing but snake-eyes.

"It was failing miserably," he says frankly. "I had to look for a way to bring in some money. I decided to list the gym with a Hollywood location service and rent the place out for movies and commercials."

Coca-Cola did a commercial in Butts' gym. So did Miller Beer. Then, one day, a movie producer came in with a particularly interesting offer.

"The guy wanted to shoot an X-rated video in my gym. I said, 'Sure you can make a dirty movie as long as you pay the fee and I can watch.' So he came in with a crew and shot *Where The Girls*

"Our stuff is based on consensual adult fun,"
—Seymore.

Sweat in one day. I watched the film being made and, at the end of the day, I said, 'I could do this.'"

Butts borrowed a camera from a friend. Then, in what would become Butts' film trademark, he passed on the usual bevy of established porn stars and pros, opting for 'real people.' Seymore went trawling for actors.

"I met this girl in a strip bar who was interested in making a movie," he recalls. "I had a friend who was constantly horny. I decided to just shoot one little scene in the gym. These people meet and have sex. I showed the finished film to the producer who made the first film here and asked him if he was interested in having me make it into a feature. He said it had potential but that he wasn't interested."

Seymore, however, was hooked. He

duplicated this hot little scene and took his stack of video tapes to an adult film convention in Las Vegas. He schmoozed the adult video poobahs. One company, Arrow Entertainment, liked what they saw. They put up the money for a feature version of the quickie that became Street Fantasies, a three day, six thousand dollar wonder that featured oral sex in a moving truck and a homeless man getting some. Arrow was happy. They tossed Butts another eight thousand dollar bone that became a one day quickie called Butt Girl and Wonder Wench.

Another company, Factory Home Video, got wind of Butts' talents. He directed a number of videos for them, as well.

"I was coming at this from a total novice point of view," he adds. "I didn't

know what the hell I was doing. But the films weren't coming out too bad."

he filmmaker believes that this early success in adult videos resulted from learning by other people's mistakes. He remembers checking out his father's adult videos years before he considered making films himself. Here, he discovered some of the hard truths of adult entertainment.

"Eighty five percent of everything my father brought home was crap," he declares. "Not only was it crap but it was a rip off. They would put a girl on the cover of the video box and you either never saw her or she didn't do the sex. As a fan I could never count on anything. And so, because I felt I was coming from a fan's point of view, I wanted to become a source of consistency. I wanted viewers to be able to

oin' Time Was Ne

As winner of a computer magazine design competition, you get control over the luxury women's island, Private Prison. All prisoners have a built-in device that explodes when they are more than two kilometers from the island, so there's no need for guards or bars, and the prisoners can do whatever they want. As Warden of Private Prison, you can use the internal video circuit to your heart's content to watch the prisoners during their daily activities, but to do this, you have to repair the damaged laser beams of the video circuit. Repair the beams, and watch the prisoners doin' Hard Time. Good luck!

N

pick up my titles and know they could get off with them."

Butt's work stood tall in the eyes of the adult mags. He gathered a rep as one of the adult video world's classy practitioners. But Seymore Butts faced a creative dilemma.

"I finally realized that this was no way to make a career," he says. "If I was going to do this, I had to make a commitment. I had to have long range possibilities and come up with a product that would have continuing name recognition."

That's how he turned into Seymore Butts, a hardcore alter ego who takes viewers through an anthology of spontaneous sex.

"The videos are basically me shooting point-of-view, introducing you to friends and fictional members of my family and their girls and watching them have sex."

eymore's rapid rise up the thighs of success began to change for

the better around the time of his eighth Seymore epic. That's when the filmmaker began getting video fan mail from a woman named Shane.

"I used to watch his movies all the time with my girlfriend," she gushes. "One day I sent him a video of my girlfriend playing with herself. Then I sent him a video of me playing with myself. Then I said 'I'm coming to Los Angeles to visit you."

Seymore, his heart literally in his hands, was cautiously optimistic as he drove to the airport to pick Shane up.

"I had only seen her body. I had never seen her face. I didn't know what to expect. I took a chance and met her."

The woman who deplaned at LAX was a knockout, bubbly with wholesome good looks. Shane immediately whisked the smitten Seymore off to Mexico. South of the Border, they started shooting their sexual adventures together.

"The Seymore movies changed at that point," Butts remarks about Shane joining the show. Rather than situations with his fictitious MCI calling circle, the films "became a series of documentary style travelogues of Shane and I, in which we go around and observe people having sex. And, more often than not, Shane and I end up getting in the act. She became a partner in my adventures."

Adventures that would occasionally turn funny in a twisted sort of way. "I Shane and I approach people who we are attracted to and just tell them what it is we do. We're totally honest when we tell them that thousands of people will be watching them at some point and we find that a lot of people, deep down inside, are actually excited at the prospect of doing this."

utts' videos became a phenomenon in the adult video universe. And that might have been enough. But ever inquisitive, he answered an invitation from some guys in Santa Monica. They said they

"It doesn't bother me. He's making an honest living,"

SEYMORE'S MOM.

picked up this girl on a public beach and convinced her to give me oral sex in a lifeguard station while I videotaped her," chuckles Butts at the memory. "I got so excited that, just when I was

about to orgasm, I accidentally turned the camera off.

"When I got home I put the tape in my player. I was watching this great action and all of a sudden it went blank. I called the girl up, explained to her what happened and she was more than willing to do it again."

For some folk, why people are willing to do it the first time is the ultimate mystery. Butts disagrees. He claims that he and Shane are nothing if not upfront about explaining things to their potential actors.

"Our line is really being honest with people," he says. "I'm honest and complimentary but not in an overt way.

wanted to show him an avenue for his films that he had never even thought of. As he entered that small apartment, Seymore A couple of screens from Seymore and Shane's latest interactive adventure

Butts stepped into the new world of interactive adult entertainment.

"There were these four guys living in sleeping bags in a one room apartment," he recalls. "They approached me and said they wanted to do a CD-Rom. They said 'Hey man! We can do some really neat things with your footage.' I walked into their bedroom and saw they were basically working continued on page 80

A first person

sexual

adventure

with amazing

3D graphics.

IF NOT FOR BASIC HUMAN REQUIREMENTS, Space Sirens gives CD-Rom players a good reason to never leave the computer. As stimulating and erotic as CD-Roms get, Space Sirens by Pixis Interactive offers everything a horny fella could want: sexy, cooperative babes in four fabulous flavors: (a) a buxom, exotic beauty with luxurious black hair; (b) a youthful brat with an attitude; (c) a dirty blonde with dirty hips; and (d) a gorgeous brunette with a killer smile (our favorite!). A hybrid (Mac or PC) game, Space Sirens pro-

sequently enter, as well. The amazing 3D graphics look as if they were pulled directly from *Aliens*.

The disk features Pixis' Touch and Feel Interface (TFUI), an easy to master format. You use the hand

time we got close to making a Siren come, we prematurely soiled our hard drive. If you come without her, she gives you a few choice disparaging words. While the graphics run very smoothly, the navigation tools could be frustrating; we found it difficult getting to the right rooms, especially the one with the brunette. Here's a tip: these computer babes act like real women. They like foreplay. Take things slow and they'll respond positively. Rush things and they'll berate you mercilessly.

All things considered, Space Sirens is recommended for it's high quality graphics and beautiful actresses. It's a great substitute for actually owning a spaceship stocked with willing women.

-BUDDY SCALERA
AND PATRICK VITACCO

space sirens

PIXIS INTERACTIVE

vides a first-person point of view for sexual adventure. You become a space pilot who lands on a mysterious space station. You enter rooms to meet willing women, who you will sub-

and penis tools to initiate sex on a 3D model. Click on the woman's breasts with you hand tool, and a live-action video of hands caress her. Click on her mouth with your penis

tool, and ... well, you get the idea. The disk does have shortcomings. It proved nearly impossible to get these women to reach orgasm. Every

The peep booth

in the rear

of the "store" is

the title's

true gold mine.

ENTERING PEEPSHOW'S VIRTUAL "PEEP SHOW", the high quality of the graphics and sexy blues saxophone foretell the pleasures within. The detailed interface really evokes a "...sex shop in the heart of Times Square."

Browsing the shelves of the "store," you'll find high quality video and even a magazine rack that allows you to leaf through its seedy periodicals.

But the peep booth in the "store's" rear is the title's true gold mine. Dragging a

peepshow

INTERACTIVE ROMANTICS

quarter to the coin slot offers a voyeur's-eye view of the beautiful women dancing within. The program offers you the option of "tipping" your dancer. Your wallet pops up on the screen. The more

you tip the more graphic the video payoff.

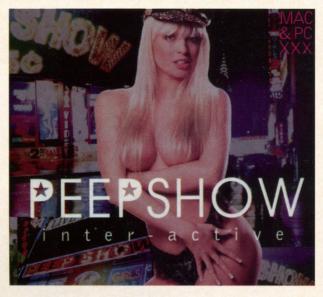

Of course, all this has a price (beyond the

\$49 list). *Peepshow's* install program takes around five minutes to load on an i486 DX2/66mHz. *Peepshow*

turns out to be well worth the wait, however. ROMantics has made a significant step in the right direction, discovering a fun and innovative interface for their video. From the poster-lined stairwell in the entrance to the tiniest detail of the peepshop, the graphics are truly excellent.

Like many current adult titles, Peepshow slips by trying to force an essentially

non-interactive activity like voyeurism into an interactive CD-Rom. This creates a title with little game play and a fairly minimal play life. There were also several brief pauses in the audio, though the sound track contributes to the title's New York ambiance. The peep boothitself however, is an excellent example of what a little creativity can do for adult CD-Roms. Peepshow's visual presentation really shines. Although culled from tapes connoisseurs may already have, the surprisingly large amount of video runs quite smoothly. The variety of beautiful women and innovative premise make this CD a winner.

FOR MORE INFORMATION CALL MISSION CONTROL 800-999-7995

IN THE PAST HANDFUL OF YEARS.

the world of the Internet has grown faster than an adolescent boy and become nearly as gangly. Even the White House can be contacted by anyone with a modem and access to the Internet (ie. joe@aol.com).

The ways of getting into the net have expanded, as well, with a variety of popular on-line services offering entre.

With this rate of expansion, it doesn't

the adult guide to the internet

take a huge leap of logic to assume that adult on-line options have increased at an equal or greater rate. It ranges from general material to some very specific interests.

INTERNET ACCESSIBILITY

There are many ways to access the Internet. Obviously the easiest (and cheapest) is to have your employer provide it for you. For all of you professors and University employees, chances are you already have complete Internet connectivity.

But for the vast majority of the population, that means spending money. Every Internet provider has its advantages and disadvantages, so shop around. The "big" names, like AOL and Netcom communications, usually offer most of the services provided. Check for abilities like File Transfer Protocol (FTP), USEnet newsgroups, Telnet and gopher. Delphi and Netcom offer IRC (Internet

Relay Chat) access. Check with each group, and take advantage of their free trial periods to begin your "surf search."

LISTSERVS

There are e-mail listservs for every interest. A listserv is an automatic "group mailer" so to speak. You subscribe to a list that you may enjoy, such as "bisexul" for bisexual topic discussion, and your e-mail to bisexul automatically gets for-

warded to everyone who has subscribed to the list. Point your gopher application to gopher.baylor.edu for a complete alphabetical listing of list-

servs available. A short description of each listserv and instructions on how to subscribe are also on gopher.

IRC

For those of you with access to Internet Relay Chat (IRC), check out some of the more adult channels, such as #netsex or #truthdare. Since IRC is real-time interactive, the discussion topics and participants change every few minutes. A warning though: IRC is very addictive.

QUESTIONS

There are a couple of e-mail addresses out there for those of you with adult-focused questions as well. There is a store called "Good Vibrations" in San Francisco that will answer your questions to the best of their ability, everything from condoms to cunnilingus. Send an e-mail to good vibe@well.sf.ca.us with your woes.

SKYWALKING INTO

THE CD-ROM ARENA

WITH WING

COMMANDER III

BY HANK BORDOWITZ

interactive adventures of

MARK HAMILL

e're going to do a quick test. I'm going to mention a name and you're going to tell me the first thing that comes to mind. Ready? Mark Hamill. You thought about Luke Skywalker, didn't you? Certainly, Hamill made an indelible impression on the world's psyche with his contribution to the *Star War*'s saga.

Such roles create and destroy careers. "When I finished playing the character in the early 80s," recalls the actor, now in his mid-40s, of the aftermath of playing the perpetual postadolescent hero in those three films, "I had to redouble my efforts to try and look to the future rather than resting on other people's laurels or even on my own prior work. I mean there are so many conflicting emotions. It was a very positive experience in my life, but was is the operative word. That is firmly in my past. It is a character that has gone on and will go on long after me in various forms."

Like many actors, he has become so associated with the role that even over a decade later he must consider the parts he takes carefully. It's not a good idea for him to look or feel like he's cashing in on that fame. Avoiding typecasting became so important, he spent close to a decade working on the stage. How long can an actor play a young warrior, after all?

This consideration makes one of his most recent projects that much more interesting. "The thing that's coming out from Origin is the most exciting thing in my life right now," the actor remarks. "I've always avoided space opera for the obvious reasons. Then this thing came along."

The thing in this case, refers to Origin Software's Wing Commander III: Heart of the Tiger, one of the most ambitious projects available on CD-Rom (PC only, so far, folks). Crammed with so many choices and possibilities, the story requires four compact discs. Nearly the entire game gets played with live action, cinema quality clips. In addition to being just about as much bang as you can buy for an interactive buck, (a street price of less than \$60) the software has a credible story line, about a shoot-out in a possible future between human-kind and a race of felinesque warriors who would wipe us out. The interactive film sports credits that would do any Hollywood Movie proud: Malcolm McDowell (A Clockwork Orange, Time After Time) plays Tolwyn, the commander of the Earth forces. John Rhys-Davies (Sala in the Indiana Jones films) plays Paladin, a fellow defender of humanity. Back To The Future bully Tom Wilson, Jennifer MacDonald and Ginger Lynn Allen are also featured. And then there's Hamill, playing the hotshot pilot. But in weigh-

ing the project, Hamill's intrigue at the aspect of acting in a game overcame his shyness of "space opera."

"I met Chris' Roberts," Hamill says, alluding to the director of the *Wing Commander* series. "It was engaging to me to be in the gaming market. For 20

"Technology has a way of catching up with you."

years, I collected boardgames. It's sort of come to an end just for space limitations. I have always loved 3D and puzzles and games and word games and Scrabble and board games, Monopoly, everything. We had Pong, we went right through the history of video games and this thing was something I would love to play. I was curious as to how they were going to do it."

Not that this is Hamill's first experience acting in a game. His last experience was as far from this as Pong is from the current crop of 32 bit car-

Far left top: a scene from Wing Commander III: Heart of the Tiger; far left bottom: Chris Roberts, director of the cinematic game; left: Mark Hamill as his latest star warrior, Chris Glair

tridge games, but it gave him some background.

"I had done the voice for an animated interactive game," he notes. "This was (Sierra's) Gabriel Knight with Tim Curry. I didn't give much thought to live action then because I thought it was far down the road. Technology has a way of catching up with you." Acting in a CD-Rom movie has its inherent difficulties. For example, much of the time the environment that Hamill and his fellow thespians acted in was an

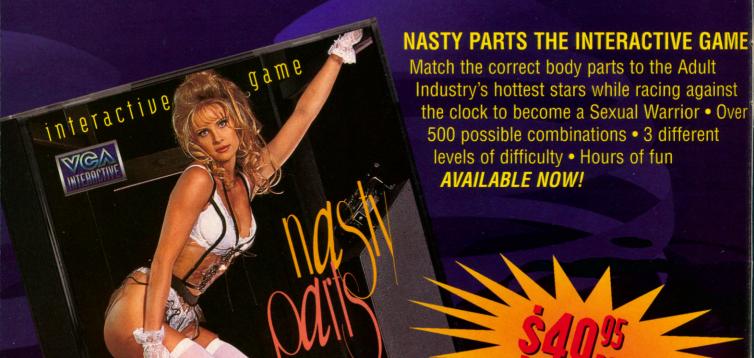

enormous studio painted a blue green color that the camera saw as transparent. The actors responded to an environment that the tech crew would generate later.

"All of the backgrounds," Hamill marvels, "are computer-generated."

But the blue screen sometimes was a less formidable foe in Hamill's ability to project than the shenanigans that went on during the moments the cast was off camera. On the other hand that element makes the work fun.

"I just really had a good time doing it," Hamill concludes. "I'll never forget Malcolm McDowell. He kept us in stitches all day long. Same with Tom Wilson, very funny guy from Back to the Future, who played the bully. Even if you can't afford to go out and buy this thing, go to a friend's house and watch the outtake reel to see what Tom Wilson put me through. They've cut it down to a serious storyline, but this guy fractures me. It was hard to look at him with a straight face. Probably some of the best acting I do in the movie is looking at him seriously."

of scantily-

clad women

-INNERWARE

INNERWARE -THE PRINZESSEN
AMBIENT LINGERIE
CATALOG
ON CD-ROM, VOL. I
MOMENTUM ELECTRONIC
PUBLISHING

This classy CD-Rom takes sexy undies into the 21st Century. The package combines photographs, music, video and lots of attractive women dressed in expensive and scanty clothing. This should appeal equally to the serious lingerie purchaser and fetishist.

The program gives you three ways to view the merchandise. The catalog can be accessed either by designer (30 different ensembles by 11 companies, including Bolero, Filodoro and World Domination) or

by piece (bra, panty, robe, club wear, etc.).

Most of the items also have videos, allowing you to watch the model show off the items to their best advantage. Finally, there's

a runway show where you can see the models parade by, and stop for more information when something strikes your fancy.

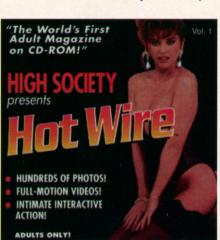

Each picture gives you color, size and price information, and the program also gives you three ways to place an order: toll-free phone call, printed order form and even fax modem.

—Paul J. Grant

Hot Wire was the first of the magazine format CD-Rom's to hit the market. It is easy to see why other publishers are falling all over each other to produce more of the same.

While operated by a

middling graphic interface, Hot Wire's high-resolution photographs (requiring a 16-bit video card) are spectacular. The diversity of interfaces within this single title truly mimics the woven tapestry feeling one gets from a well constructed magazine.

High Society loaded this CD with hundreds of beautiful still shots and an innovative "Cum with me" button. Press it, and your computer starts carrying on in ways reminiscent of "that scene" from When Harry Met Sally. The title's \$39.00 price makes it a true bargain, costing far less than many compararble premier CD's. It also presents an excellent way to get the feel for what interactive adult CD-Roms are all about.

—ED TSUNODA

FRAT GIRLS OF DOUBLE D DOUBLE DIGITAL XTC

This DOS-only program (it won't run under Windows) has solid picture quality and gives you two options for getting to the action.

The first screen allows you to open a long, badly done story line (the truly atrocious Italian accents are particularly annoying) about bad dentists and strange friends. As things unfold, various sexual escapades occur and the viewer has his choice of watching them in sequence or choosing his fun from the menu which accompanies each sex scene.

Alternately, you can enter the Eat Sigma Pi fraternity house right from the start and visit one of four rooms. Wiggle your mouse here and there once you're inside and you'll find highlight areas which you can click to get a hard core segment from the film without the silly story to slow things down. There's even access to a "girl's only" area from stairs at the end of the opening hallway (you access this segments by finding highlights on the windows outside the frat house).

One of the stars here is the grotesque Wendy Whoppers, by the way, who's certainly more than a handful.

—JAY JACEY

TOKYO NIGHTLIFE A6 INTERACTIVE

As you play Tokyo Night-life Interactive, A6 Interactive would have you believe that you will "live and interact in a computer generated 3D Toyko. Explore the streets around you and discover various 'adult entertainment' establishments Tokyo has to offer." If this is true, Tokyo is a tiny, dull, badly animated place.

Interactivity, such as it is, involves clicking on whatever looks clickable to see if anything happens. A drawer opens; a drawer closes. A window cracks. A tea cup tips over. Big deal. The "explorer" can rent boring, inexplicable videos; visit a geisha house; put the moves on your neighbor; spy on other neighbors; even get pushed down a

flight of stairs (no—really!). The interface is a clicker's nightmare. The arrow doesn't change shape and there's no way to

know if a click on the frame will change screens.

If this material is typical of Japanese adult video, then women are even more objectified than typical American fare. That may be the most disturbing thing about this substandard package.

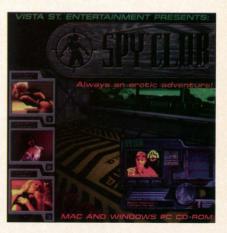

—JEFF LANG

Spy Club is a cute li'l game. Absolutely adorable.

Now I realize that *Spy Club* is supposed to be a rough and tumble, action erotic adventure hot enough to make James Bond blush.

But let's face it. It's darling. The premise is that you are a 'rookie' spy. Your first assignment: A KGB agent at the infamous Eros Spa has a detonator to a

nuclear bomb. She's going to destroy the world unless you can infiltrate the female-only spa, steal her purse and haul it back to headquarters.

Piece o' cake.

Now, let's skip over that we don't know why this KGB agent has run amuck in the spa (something in the diet?) the fact that the KGB crumbled a few years back (this is the retirement package?), and what the heck'll happen if she spills makeup on the detonator. You have to save the world.

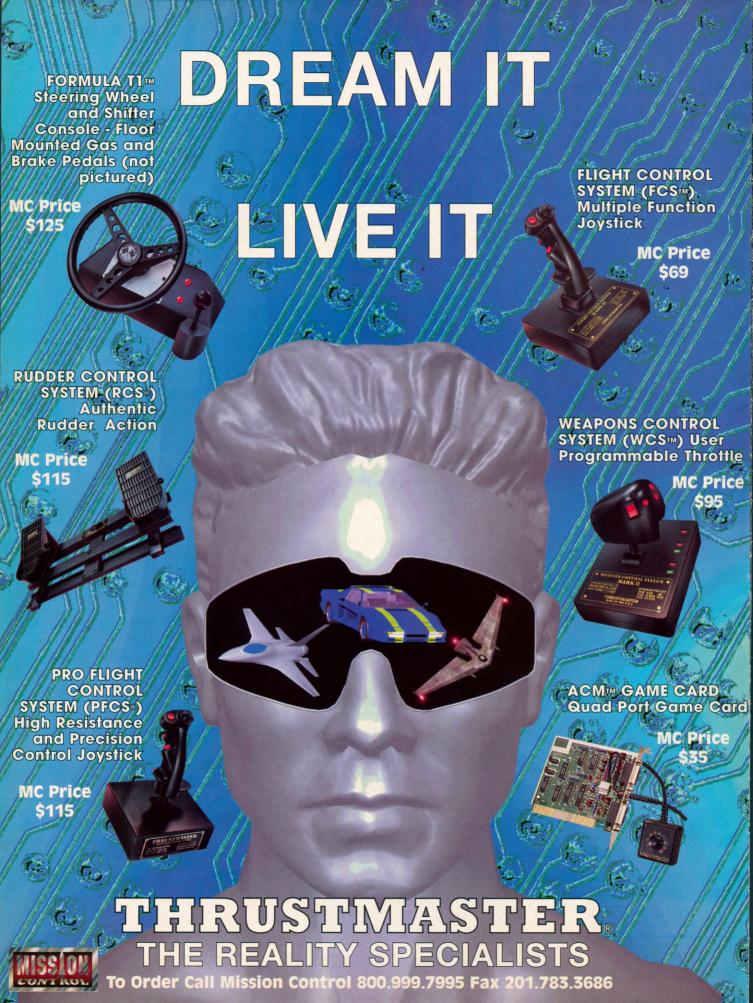

First you have to get past the receptionist. As long as you don't kill yourself, this is a done deal (realize, however, that 'killing yourself' is provided as an option).

You get a cuddly, lovable commanding officer who provides you with warm advice when things start to drag.

Then, well, you have all facilities of the spa to visit, and the various video clips to watch. And, hey—you've also got a world to save.

-RUTH MORRISON

Buyers Guide • Coupons • Games • Order Form We Can Sell You Any Product Advertised In This Magazine!

COMMUNIQUE

WELCOME TO MISSION CONTROL

Spring, 1995

Mission Control exists to present you with the rich variety of adult entertainment selections available on adult CD Rom. This catalogue follows up on our wildly successful Winter Communiqué published last December.

Discerning buyers like yourself will find in these pages a menu laden with exotica and erotica. We have the latest and hottest titles, the classics, and something for every taste.

Be sure to check out some brand new releases, like Virtual Valerie II, Seymore Butts II: In Pursuit of Pleasure, and Hollywood Body Double starring Shelley Michelle. We are also taking pre-orders for a must-see new interactive title, The Misadventures of James Spawn, from the folks at Digital Playground. This Dream Theatre Production is funny, sexy, highly interactive and shot on film with high production values. It's a three-CD set that will set a new standard.

But, let us not prejudice you. Our staff has researched all the offerings in this Communiqué so we can help you make a selection that is sure to please. We have a huge inventory. We ship orders the same day. We constantly add products and try to upgrade our services. We want to be your only source for entertainment software. At Mission Control, customer service is our top priority.

Use this issue of the Mission Control Communiqué as your guide to the world of adult entertainment. Our knowledgeable staff can help you pick the titles. They love to talk with customers, and they are just a toll-free call away.

XXX-Hard Core

Adult CD Rom's can be broken down into three basic categories:

INTERACTIVE — Means you actually 'interact' with the program by making choices that affect the outcome of the next scene. The best examples of Interactive Adult CD's are: "The Interactive Adventures of Seymore Butts 2", "The Dream Machine" and "Space Sirens 2".

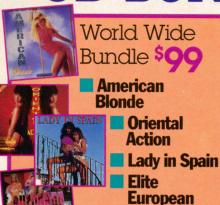

MOVIE DISKS — Just what it sounds like, adult movies on CD Rom. Many of these disks are the full movie. The advantage of seeing them on CD is the ability to swiftly jump from scene to scene

and to manipulate and use the images in other applications, please be aware that these images are copywrited and for your private use only! Some of the best examples of Movies are: Hidden Obsessions, Traci - I Love You and Elements of Desire.

PICTURE DISKS — Taking advantage of the vast storage capacity of CD Rom, many high resolution images can fit onto one disk. Often these disks contain their own viewing utilities, but any good viewer like VPIC works very well. Some of the best examples of Picture Disks are: Busty Babes 4 and Select-A-Pet.

Names and information are held in strict confidence and will never be given to other sources. We understand that some people are sensitive to the nature of these materials and will gladly remove your name from our mailing list upon request.

Forever

Let Us Blow Your Hardware!

As seen in **CD-ROM Today.** June '94

The striking clarity and color quality in these packages is as good as the current level of technology can support...Starware offers titles that could establish a graphic standard for adult fare...Some adult publishers are going the extra mile for technical excellence in image quality. Starware is a leader in

this category."

YBRID MAC/PC Virtual **Vibrations** Interactive Sampler Starware Publishing's

Virtual Vibrations Interactive Sampler gives you sample clips from our interactive movies. This is the hottest try before you buy CD-ROM available in today's market. You get over 40 minutes of QuickTime video clips plus lots of Photo CD images.

90

Interactive Hybrid MAC/PC

The Adventures of Mikki Finn

Get the world's first Double Spin - 2 DISK SET!!!

Get the world's first Double Spin XXX CD-ROM. This interactive movie is the story of a small town girl who goes to L.A. to make her musical fortune. Music isn't the only entertainment you get on the Mikki Finn CD. Ashlyn Gere stars as Ecstasy, a girl who is in the biz just for the fun of it! Interactive Movie Double

Spin drive required Hybrid MAC/PC XXX

Diedre Holland

HYBRID MAC/PC

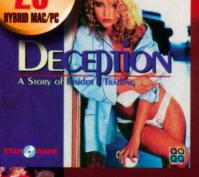

Always NEW RELEASE!!!

Starware Publishing presents the beautiful Mikki Lynn in a tale of extra-marital relations, back-seat sensations, drifters, grifters and that bad girl down the road... The one with the very short skirt, big baby blue eyes and that Stop By Anytime, Honey, attitude. Interactive Movie Hybrid MAC/PC XXX

The Other Side of Chelsea

Come over to the other side, Baby...The Other Side of Chelsea explores that deep, hid-den thing that drives men into a wild sexual frenzy

and makes them sweat each
time they look her in the eyes.
Interactive Movie Hybrid MAC/PC XXX

Deception

What happens when a two-bit thief lifts the wallet of a well-known ad exec? It's true Deception when he turns Deception when he turns Diedre's ad agency upside down in this story of who's who and who's doing who. ****A 4-Star Sex Romp Through Corporate Americal Interactive Movie Hybrid MAC/PC XXX

Beverly Hills, 90269
Diedre Holland gets an A+
for effort!!! The story picks up when Brenda returns to Beverly Hills from
college and discovers that things aren't exactly as she left them. Her
studiying certainly hasn't prepared her for the sexual fun & games going on
back home. Wait 'til you get a load of
these "extra-curricular activities"
Interactive Movie

PHONE IN YOUR ORDER TOLL FREE 800-999-7995 OR 201.783.3600

All you will need when you call is your credit card number. Our support staff will take all of the information, offer helpful suggestions and process your order swiftly. Our office hours are Monday through Friday, 9:00 a.m. to 7:00 p.m. and Saturday 11:00 a.m. to 5:00 p.m.

SEND IT TO US, LET US DO THE WORK!

By mail, by E-mail, or by Fax it's easy to order from Mission Control. Use our pre-printed order form to be sure that you give us all the information we need. Then you can fax it to us at (201)783-3686 or mail it to us at: Mission Control, 7 Oak Place, Montclair, NJ 07042. Or you can browse through our CompuServe store at GO MCS, place your order on-line, or you may reach us at 70007,1324. NJ residents, please include 6% sales tax. Be sure to check that you have signed the order form.

PAYMENT

We accept VISA, MasterCard and Discover Card. Personal checks held 14 business days to clear. Money Orders, Travelers Checks and Certified Checks are treated as cash and not subject to hold. Please inquire about direct wire transfer service. No COD's or Purchase Orders accepted. First time customers must ship to the billing address of the credit card.

SHIPPING

We can answer your questions and offer you quotes and rates through the mail, by fax or over the phone, please contact us for more details. To follow is a brief introduction to the tested and proven expertise Mission Control has to offer in domestic and worldwide delivery.

DOMESTIC

All 48 continental United States served via Airborne Express. All orders shipped discreetly to your business as well. Guaranteed overnight delivery to most addresses for \$7.00, all other addresses by second business day! Alaska and Hawaii, Airborne Express \$17.00. P.O. boxes, rural routes, FPO's APO's, Alaska and Hawaii served via Priority Mail, for only \$5,

please allow up to one week for delivery.

FOREIGN

We ship DHL worldwide. Up to 8 CDs, \$25. Allow 5 to 7 days for delivery. To Canada we ship via DHL, minimum of \$19.00 or postal service for \$9.00, please allow three to five business days for delivery. Be sure to open the titles completely as we may combine titles or repackage them to conserve space and weight. Do not return any goods without contacting us first. Mission Control cannot be held responsible for items seized by customs.

GUARANTEE

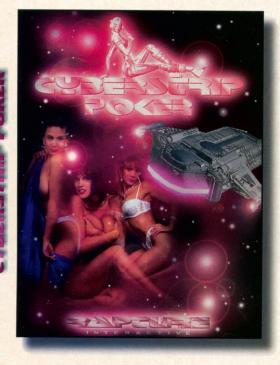

Same-day shipping on all orders via overnight courier. Allow 24 hours for order processing. If there is a problem with your order or with a product. please call us immediately at (201)783-3600. If you need to return a product, you will be issued a return authorization number (RMA). This number must be placed on the outside of the package, near our address. Without an RMA your package will be refused. All defective titles will be exchanged for the same item only. All other returns subject to a 20% restocking fee.

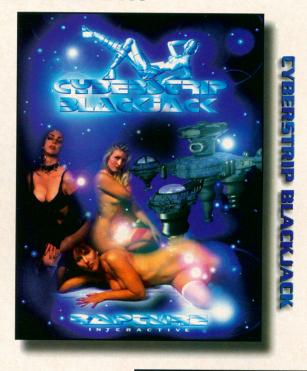

All shipping times subject to availability. Any backordered item will be shipped at no charge for shipping when in stock. This excludes pre-released items and foreign orders. Large orders and accessories may be subject to additional shipping charges depending on weight and size. Questions concerning system requirements should be addressed at the time of ordering, no credits will be issued for problems relating to incompatibility.

Names and information are held in strict confidence and will never be given to other sources.

technology

BY IVAN NAGY

THURSDAY DECEMBER 2ND

I looked in the mirror and didn't liked what I saw.

I set down with my second double espresso... the phone rings.

Berry...Berry who...I don't know him. He mumbles about CD-Rom do I know what a CD-Rom is... oh-ve.

It plays on computers...oh-ye, digitalized images....oh-ve fo'sure.

The espresso is getting cold.

Can I find five Heidi's girls to pose; sexy; some nudes.

It's a lot of money.

How much?

Five G's.

Berry says OK.

Each!

He knows. I like this guy!!!

He and his partner Allen want to come by at 5:00.

Let me check my schedule...how about 6:00.

I nuke the espresso....hate doing it. Call my bud June.

Can we find five Heidi hos to pose for ...for ... CD-Rom.

What's a CD-Rom?

What's the difference?

They'll probably want \$1,500.....

Hey June, I got five G's each!

Fo'sure we can get 'em...fo'sure we can get 'em.

Christmas in Aspen!!

The nuked espresso tasted OK. 6 P.M.

Berry E-mail type.

Allen.... smooth and talking fine.

They don't have any money... no kidding.... but they are well financed.

Allen has a partner, Paul from Malibu... he is a liquidator. ...big house...millions.

Cool....I didn't charge them enough. Money is no problem.

Way cool.

You know June needs to be paid for all the work she is doing.

They already figured on that...Paul made over five mill last month liquidating a lumber company.

I realize Allen has enormous feet. Aspen; two weeks!

Can I still get reservations... probably!!!

E-mail butts in, the disk is going to be hybrid.

I wouldn't have it other way.

It will be compatible with 8-bit and 24-bit color

Both hmm:

The 24 bit will play down to 16 bit... Hmm. ..that's the best news I had all

Allen has enormous feet.

We'll shoot the first two girls on Saturday.

You'll need to have the ten G's...in cash.

No Problem

E-Mail thinks it's a lot of cash.

SATURDAY DECEMBER 4TH. ON

LOCATION

The girls are there, I'm there.

June is there, hair and make-up is there...

Allen isn't....

And of course E-mail, he wouldn't miss it.

E-mail let's me in on a secret... Allen is always late.

I heard that.

Allen shows up. He wants to talk to me in private.

I know he doesn't have the money. Paul had an emergency. He called...he

left a message...he didn't get the message...the secretary called...she left early.

But....there is nothing to worry about Allen can pick up the money Monday.

It dawns on me... Paul is an orthodox Catholic.

Allen shifts his weight from one enormous foot to the other,

He sweats.

I'm out three G's.

MONDAY DECEMBER 6TH

No money...more emergency...more messages...more secretary...

TUESDAY DECEMBER 7TH

Allen goes to Paul's office...zip.

WEDNESDAY DECEMBER 8TH

Big meeting in Malibu. Do I want to go? I don't answer.

Evening...the phone rings. Everything is OK...Except.

WHAT'S A CD-ROM? WHAT'S THE DIFFERENCE?

Paul wants to know... how can he be sure.... these are Heidi's girls.

Do I want to talk to him? I don't answer.

Later that night Allen comes by, everything is OK,

Paul will call his lawyer... I will enjoy meeting Paul...l didn't answer.

Paul has some reservations.

I'm out of three G's and he has reservations.

This guy Paul just became my idol. I debate my choices:

Lose three G's;

Become a CD-Rom publisher.

No Aspen this winter!!

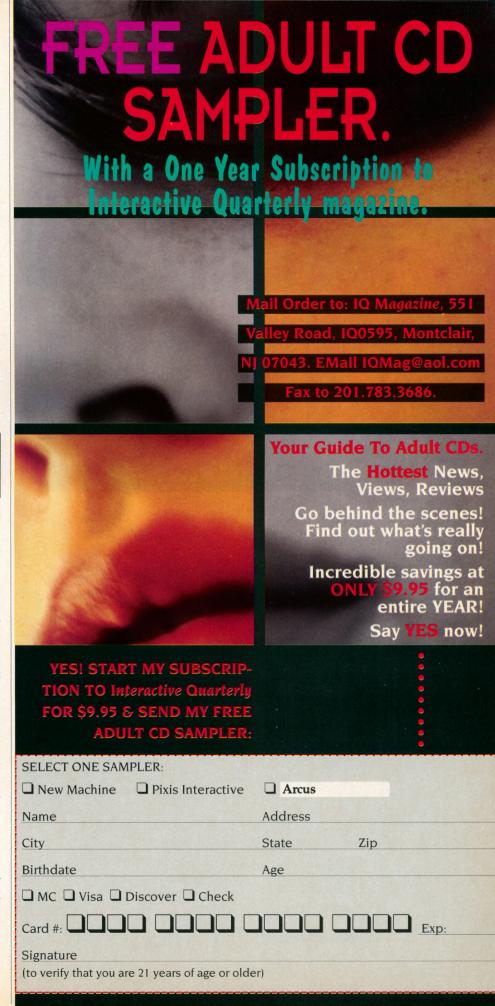

Allen is tired...he wants to go home.....

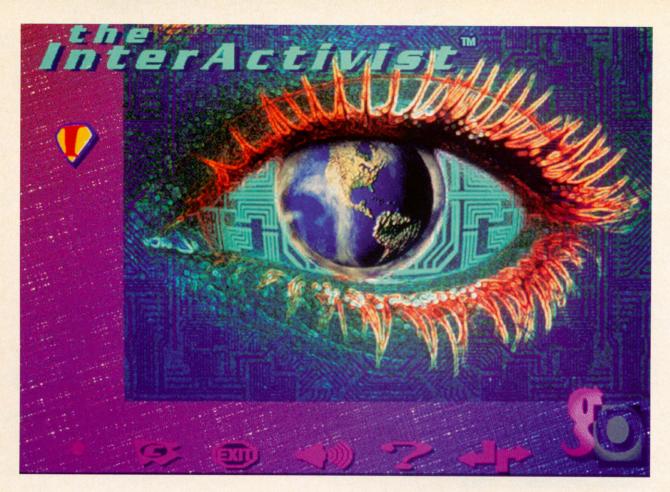

I walk him to the door.

One last question.

Allen, what exactly is a CD-Rom?

FORMER NEWSWEEK PHOTOGRAPHER AND DIRECTOR OF THE FILMS A GUN IN THE HOUSE' AND DEADLY HEROES AND EX-LOVER OF "HOLLYWOOD MADAME" HEIDI FLEISS, IVAN NAGY NOW RUNS MACDADDY ENTERTAINMENT

I'VE RECENTLY LEARNED that I'm a dinosaur. If I don't evolve pretty soon, I'm going to go the way of the dodo and diplodocus: Extinction. I'm the editor of *Interactive Quarterly*, the magazine you've got between your thumbs and forefingers. But I've seen the future, and in the future you don't wet your finger to turn the page. Not unless you want to short out your mouse.

Larry Miller heralds the future, or at least one facet of the future. Larry holds my position at a new publication called *Go Digital*. Unlike *IQ*, *Go Digital* uses a minimum of paper, has images that move, quotes you can actually hear and see coming out of the people's mouths, often in response to a question you pose. Welcome to the world of the CD-Rom interactive magazine.

"Magazine almost isn't the right word for it," Miller considers. "It's like something else. We called it a magazine, or a digital magazine because it's periodical and it has sections."

People have called *Go Digital* a cross between *Playboy* and *Wired*. The *Playboy* comparison becomes evident as soon as you see the stunning and tasteful interactive video pictorial

go digital

BY HANK BORDOWITZ

on Christine Fox. "I'm not interested in presenting anybody in a way that would make me feel kind of weird about checking it out," Miller says. "I think the pictorials that we did are respectful, they're tasteful, and with the interactive interview, you're finding out not just what the woman looks like when she has her clothes taken off. You're finding out what she has on her mind. There happens to be nudity, but that certainly isn't the focus of the product. If you measure the amount of video and photography that's on the disk, it's 82% content, 18% erotic content."

As to the analog chronicle of the digital generation (AKA Wired), many stories in the premiere issue of Go Digital deal

Is CD-Rom the futu

MAGAZINE ALMOST ISN'T THE RIGHT WORD FOR IT.

with computers and computer culture. It makes sense that a magazine you need a computer to read will deal with the concerns of people who own and use computers.

"The core of what we focus on is technology and the evolution of digital media," Miller notes. "But the focus is not on the technology. It's on the application of technology, because that's something people can and want to relate to. People also want to know what's going on. They want to be kept up, but want to be kept up with real world examples of things they're interested in."

Of course, you can't discuss the idea of computer culture without tripping over the 'net. The first issue of Go Digital has a feature on music online, and an entire section dealing with the politics of the infobahn called "Baud Squad." You can sense the reasoning: if you're far enough into computers to be checking out CD-Rom, you probably have at least dabbled on the net. And if not, Go Digital wants you to.

"We're offering one week free Internet access through a company called PSI," Miller says. "All you have to do is have a modem. We've got it so it will go directly to our home page, using mosaic. We're going to keep that going. So, every time you buy a disc, you're going to get seven days of free internet access. It's very internet friendly. We want people to explore it."

You won't find all of Go Digital at the Go Digital home page. You will, however, find bits and piece of what they're working on, as well as projects from the other areas of the magazine's parent company, E Media.

"I put up maybe 15 ten-second video clips, little samples from the stories," Miller remarks about his home page. "It just takes too long to download video. Why burden people with it? There's no reason to put it on the server if people can't access it reasonably. I put some ten-second video clips, there are some audio samples, which don't take nearly as long, and we're also going to have text-based articles by reporters who are more print oriented."

The premier issue of Go Digital represents the culmination of seven months work. Set up like a magazine, you open the cover (the jewel box) with it's fetching picture of Christina Fox and pop the contents into the Rom drive. After a few interesting graphics, it opens up to the digital table of contents. There you can select the section you want to check out, from the features, music section, inter-

active entertainment section, the pictorial, Leary explains the technology section, etc. Each of these it all to you

sections a screen from has a contents screen of its own, allowing

Left: the image is the thing: Go Digital Right: the Go Digital table of contents

you to pick the feature you're interested in or the record review you're curious about or whether you want to see the pictorial or check out what Ms. Fox has to say (do you love her for her body or her mind?). Several stories use an interesting device which asks the same question of several of the subjects, allowing you to mix and match the question with the respondent, or compare responses, or only get responses from people you want to hear from. While not endless, the permutations are many and varied.

"One thing that we're going to do better is set up the stories," Miller says. "Because we were working with so few people, most of the stories didn't have the direction they could have used. I simply couldn't do it. The interactivity is pretty dumb. What I'd like to do is experiment. We're going to tell the story a little bit more to begin with and put the interactivity in, to supplement the information. I don't think people need to click all over to get a story. People don't mind being told a story so long as it's a good one. They needed a little bit more information available to them up front, so they have the foundation necessary to really get into the issue, rather than going 'what is this, what does this mean?' I don't know how many people aren't going to get it. I think I could have done a better job with that. Better introductions to stories and tying up the loose ends afterwards. A little more narrative.

re of the magazine?

YES THERE HAPPENS TO BE NUDITY, BUT THAT CERTAINLY ISN'T THE FOCUS OF THE PRODUCT.

Not cutting out the interactivity, but adding narrative. Just to better put people in touch with the information that ties everything together."

Miller has a love/hate relationship with the idea that Go Digital is a magazine. He recognizes several of the benefits of calling the disc a magazine, however. "We're going to start traveling," he remarks. "For example, we're going to do a feature story on beer for the next disc. Not like Budweiser, but the whole thing, all about beer. We're going to a beer camp in Kentucky. If you're a member of the press, everybody wants publicity, so most of the time they will give you what you want for free if you ask. I don't drink, but I'll be filming. My partner, the guy who did the rave story (in issue #1), is going to do the beer story. He loves to drink beer, and he was thoughtful enough to realize that if you have two drunks trying to do a story, you're not going to have much of a story. So, I'll be filming that story. It should be interesting. We're going to film at beer camp, we're going to film just some guys in their house making

Always an erotic adventure

"It's done

with a good sense of humor and an extremely slick interface!"

Electronic Games

Jan. 95

Light Street Ent. Pipe Blvd. PH-P Los Angeles CA 90035

beer, it's all about beer. It will be an entertaining story. It will be fun. The disc is not going to be filled with fun stories, although one of

my partners would love for it to be all fun stories. There are going to be some fun ones and some that cut to the heart of important issues, but in an entertaining way."

Another thing Miller likes about being periodical is the price point. At \$14.95, Go Digital may be the lowest priced piece of worthwhile computer software on CD. "Hybrid disk, low price point," Miller sums up the Go Digital retail philosophy. "When it comes to buying a magazine, people don't want to spend a lot of money. But it's going to be inexpensive enough that people who buy CD-Roms are going to be pleasantly surprised by the amount of content they get for \$14.95. There's no question that it's one of the best deals in CD-Rom that I've ever seen. For \$14.95, it will take you hours to go through everything. Because of the barriers to distribution that we're going to have because of the nudity-and yeah, we're going to have a PG version, but it just may be another month before that gets out-it's going to be word of mouth and good press that's going to drive people to the alternative outlets where they can get their hands on it."

The schedule is breakneck. Miller expects to have his second issue out by June, and continue quarterly. No mean feat, considering that the dozen or so pieces in the magazine have to be edited, programmed and pressed. Beyond that, *Go Digital* is certainly more than a magazine in the traditional retail sense of the word. Not only does it contain elements of *Playboy* and *Wired*, there's also a strong strain of *60 Minutes*, the idea that the images move. With that in mind, Miller is looking to expand the periodical's horizons.

"It's like what I think would be a prototype for interactive television. We're talking with some of these companies that are running interactive TV test beds. We're into negotiations, trying to get in on some of these trials. It's the kind of product that would drive people to be more interested in interactive television, given the fact that in these trials the only services you're really getting are restaurant information and maps and points of interest around their town, some shopping. That's not very exciting. That's not what's going to drive the market. It's entertainment."

At this point, though, *Go Digital* should be available, as you read this, at many software stores and via mail order.

With more

than 90

minutes of

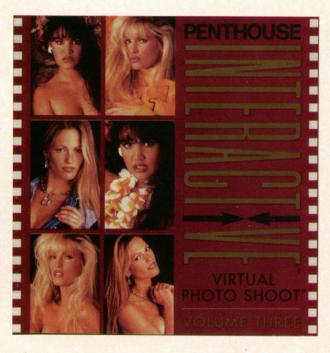

video, this one

is definitely a

winner.

PERHAPS THE COOLEST THING about this enjoyable, well produced offering from Penthouse magazine is that it really does simulate a Penthouse Pet photo session. You can click off the shots of your choice, save them and put together a selection of photographs for your fantasy spread. Working with other graphics programs and the saved photo files, you could even prepare and print out those pages.

There are three Pets available to star in your private shoots: Dominique St. Croix, who does her best work on a bed; Natalie

cific instructions as things progress. In several instances, there is a choice of camera A or camera B, thus and usually encouraging. Choose to go through a video without taking a single photo, though, and

Guccione can be downright testy.
Another neat gimmick: should your attention stray from the screen or you get distract-

screen or you get distracted, the Pet in action and Guccione will alternately call your attention to the fact with everything from come-ons to whistles to stern reprimands.

With more than 90 minutes of video and enough alternatives to keep things interesting through several viewings, this one is a definite winner.

-JAY JACEY

virtual photo shoot

PENTHOUSE INTERACTIVE

Lennox, who steams things up in a nude exercise workout, and 1993 Pet of the Year Julie Strain—by far the hottest of the trio—who shows a real talent for exploration.

Each lady performs in a separate video, with the viewer having several options along the way to customize the event. These range from a very early "strip naked" to more speproviding different perspectives on the action.

The full motion videos are excellent in quality and performance. The sound quality is also quite good. The Pets introduce themselves at the start, there is background music and at the close of each session, Bob Guccione himself evaluates your photo workmanship. These are canned responses, of course,

After five

scenes, the

hostess

presents a

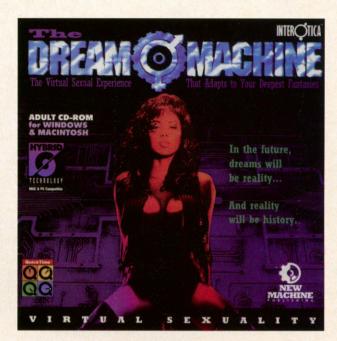

fantasy

tailor-made

for the user.

THE DREAM MACHINE claims to be "the cutting edge of virtual sexu-reality," an awkward phrase. Thankfully, the disc itself is a clever idea, executed with moderate success.

Entering *The Dream Machine* a hostess greets you. She bids you enter any of several easily-discovered rooms secreted in an underground labyrinth. The animation scroll rate was slow and jerky (no doubt this would be improved by running the program on a faster machine than my 386/40). The accompanying "clip, clop" sound effects were annoying, but easily ignored.

into The Dream Machine.

After five scenes, the hostess presents a fantasy tailormade for the user based on his responses. Varied responses only revealed and even employ them.

The interface is a simple left-forward-right keypad set doubling as movement and "VCR" controls. It also features two other controls: an exclamation point-shaped "boss button" that brings up a pseudo-Windows screen and a big pink button that coos when pushed. The program was easy to load and a READ ME file covered all the technical difficulties a user might encounter.

While *The Dream Machine* isn't as "interactive" or "adaptive" as the cover copy claims, it's an entertaining and imaginative piece of programming that could be especially fun for users bored with more mundane adult CD-Rom products.

-JEFF LANG

dream machine

NEW MACHINE PUBLISHING

Opening a door starts a film loop from one of ten adult movies, a kind of adult-film smorgasbord. Each illustrates a fairly typical scenario. Upon exiting a room, the hostess quizzes the user, presenting a menu of possible responses. The hostess' questions and her comments about the responses start out general, but grow more specific as the user moves deeper

three different fantasy sequences. Unfortunately, none were as interesting as the film scenes. Not bad, mind you, just tame.

Moving through the hall-ways, the user can locate various objects (an ice cube, a vibrator) and can present them to the hostess as gifts. Depending on how far along you are and how well you've gotten to know each other, she may accept them

REVIEW

A classy

title, ideal

for couples

looking

to set

a romantic

mood

ELEMENTS OF DESIRE

NAUGHTY BUTT NICE CPV INTERACTIVE

The first thing this soft core program will do is confuse the hell out of you. The opening screen goes through six passes of sexy snapshots, then stops with one photo from each pass, aligned at the top and bottom of the screen, with the title in bold red letters in the center. The natural inclination is to click on each photo in turn to get some action. Wrong! You have click the title. Who'da thunk it?

Once you figure it out, there are several choices on the opening screen. You can click "Continue" and run through 15 video segments; use "Montage," which starts a fast paced sequence of lovely ladies in various stages of undress dancing and pos-

ing, or choose "Gallery" to select one of 15 beauties to watch individually. A nifty feature is "Hide," which changes the screen to a fake commodities report (a click anywhere on

the screen brings back the gals).

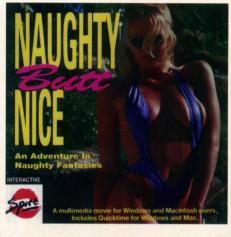

Lovely ladies, nice fast cut photography, excellent picture quality. Most definitely not X-rated (crotches are even airbrushed out in spots, which is just too tacky for words).

—JAY JACEY

ELEMENTS OF DESIRE ULTIMATE VIDEO

In an era where too much XXX-rated "entertainment" is badly shot on video, poorly acted by frumpy people, indifferently lit

and set against a background of annoying, latter-day disco music, Elements of Desire is a true rarity. Filmed with genuine attention to lighting and camera placement, filled

with attractive players, and featuring a mellow sax-heavy score, *Elements* pleases both the eye and ear. It's the rare adult film that should appeal to both men and women, and thus ideal viewing for couples looking for something to set a romantic mood. On the other hand, if you want your action raunchy and repetitive, perhaps you should look elsewhere.

Of course, those looking for plot and characterization should probably be hitting their local Blockbuster. Elements of Desire is thin in those areas, even for a genre notoriously light on the literary side. The basic premise is that the narrator (the film has no actual dialogue), a "restless and unfulfilled woman" played coolly by blonde, pulchritudinous Julia Ann, is channel surfing one night after getting a new satellite dish. She discovers a

REVIEW

VGA graphics,

slow install and

generally sleep

inducing

game play

GIRLFRIEND TERI

ELEMENTS OF DESIRE continued from page 64

European station showing erotic videos, from lush to lightly kinky. Soon she's hooked and experiences a sexual rejuvenation. Eventually, she gets her husband and best friend interested as well.

The viewer interface is basic: play/pause switch, volume control, and a slider that allows you to rewind or fast forward. The film is broken down into ten segments of varying lengths, each

with a backup portfolio of 24 stills. Both video and sound are uniformly excellent. In fact, you can listen to each musical selection separately, should you choose.

Credit is due to writer/ editor/cinematographer Cameron Grant for putting together a film that is sensual as well as sexual, and showing what can still be done with the basic elements of desire.

-Paul J. Grant

GIRLFRIEND TERI

Her makers call Girlfriend Teri an "...interactive, virtual woman" with "...true artificial intelligence." After playing with her for a while this starts to sound like the build up your buddy might give you about a blind date. You know, the kind you want to sneak out on the next time she goes to the ladies room.

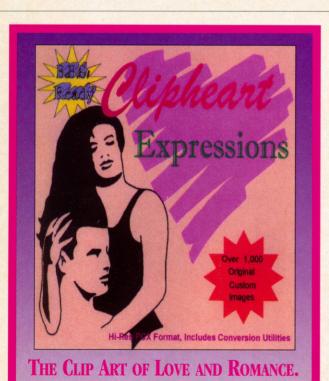

They tout *Teri* as a virtual woman. To an extent

that rings true. She certainly took forever to get ready. The program takes a long time to install. Once she's in your computer, you get to experience her "truly artificial intelligence" which peppers her conversation with expressions like, "... I don't understand..." and ". . .tell me about. . . " often followed by fairly common words. Also, the beginning of the program responds to your sexual advances by asking you to talk to her more, which is a little to real for the title's own good.

The VGA graphics, slow install and generally sleep inducing game play make this title one to avoid. However, *Teri* lives up to her virtual woman billing one other way. The install loads a "read-only" file on your hard drive, so even though you have gotten rid of her, she constantly annoys you and never seems to truly go away (unless you take the time to use the uninstaller that comes on the CD).

FIRST-PERSON-THREE-DIMENSIONAL-shoot 'em-up games are all the rage right now. In fact, it is rare to pick up a review of a new CD-Rom game without reading, "...it's like DOOM, but..." This standard of measure has begun to change with the release of Lucas Arts' Dark Forces.

A deftly woven story line; incredible 3D graphics that change the scenery with each progressive level; mind numbing puzzles; a seemingly undefeatable enemy; this game has it all. The relatively simple first level gives you a chance to get the feel of perusing this 3D

ors, all designed to make navigating the world itself a challenge. At the beginning of each sequence, you receive a briefing by some seem unkillable. Thankfully, the arsenal at your disposal also expands with each accomplishment.

The Dark Forces environments navigate fluidly and intuitively, but it can prove difficult to get an adequate perspective when you look down. This makes it necessary to take blind leaps of faith off some perilous cliffs.

Dark Forces is one of the first and best attempts at blending the two most popular genres of computer gaming, an excellent example of both an intellectual puzzler and a shootem-up adventure. It's storyline and incredible graphics make it a must have and one of the best computer games of all time.

-ED TSUNODA

dark forces

LUCAS ARTS

world, which can be a little disorienting at first. You'd better get a quick grip on it though, because the intensity picks up quickly. Fifteen levels, ten weapons and a defeated Empire later, you will still be wondering how you pummeled that Kell Dragon into submission bare-handed.

Each level provides you with an intricately designed, living environment. There are moving panels, hidden doors, floor convey-

rebel ingrate who barely acknowledges that you have once again saved the rebellion before sending you off into some infinitely more perilous fray. You also confront several mind-bending, hair-pulling, nail biting puzzles with each mission that require MYST-ical intellectual prowess. Of course, you also face a succession of increasingly ornery opponents that culminate in the Dark Troopers, who at times

REVIEW

advance or choose any section by means of dragging a slide. The video and sound digitizing by Pixis is overall quite good (although some clips' source material is less than pristine). Most important, the action is hot and invariably watchable, providing good value for the money. -Paul J. Grant

Tabloid Beauties delivers an excellent example of how

> far a little class can carry an adult CD-Rom these days. You start out at a street corner newsstand, where the women gracing the covers of the tabloids are as beautiful as Jordan Lee, the

cover girl of the CD-Rom itself. Presented with a scattered collage of front pages, you just click on any of the newspapers and 'pick

them up.' The newspaper 'opens' and you are presented with a QuickTime slide show of the woman on the cover. You can then look through several high quality stills of the woman at your leisure. The best is yet to come, though. One click on the microphone icon brings you a pay phone that allows you to "interview" the lady by choosing from a list of questions. The excellent audio and the erotic topics of conversation offered make this an arousing experience. Although the video portion of this title was disappointing, the interactive phone interviews and beautiful women make it one of the best picture disks of the year.

-ED TSUNODA

 Arcus Entertainment rolls out the digital fireworksfull motion, full screen-and goes shopping.

GINGER UNLIMITED **FUTUROM**

If you are a follower of Ginger Lynn's long career in adult films, then this retrospective collection will undoubtedly hit you where you live. Over the course of eleven video clips, well over an hour's worth, Ginger shows off her various erotic talents with her customary enthusiasm and skill. There is something for all tastes here, with healthy doses of girl/girl and group scenes, featuring such co-stars as Christy Canyon, Tom Byron, Jamie Gillis and—in one memorable sequence—the legendary, late John Holmes. The viewer interface is simplicity itself. You can watch each clip straight through, jump forward to one of three "good parts," frame

and skill.

GINGER UNLIMITED

DIRTY DEBUTANTES 1 NEW MACHINE

No plots, no pretending the camera isn't there, no pretense at all when it comes down to that. Just rank amateurs (or nearly so) doing what comes naturally. Six future porn stars appear here in their first, or very early, performances: Tabatha Cash, Francesca Le, Chelsea Linx, Mimi Myagi, Rocco Siffredi, Jake Steed and Teri Weigel.

All the main action is from the *Dirty Debutante* films of well-known director Ed Powers. Unfortunately, the lighting is not always the best and the static one-camera point of view can get tiresome, but the honest enthusiasm of the performers is definitely a plus. How much you'll enjoy it all probably comes down to whether

you find it arousing or disconcerting to have a cameraman take an active part in adult action, interviewing and encouraging the performers before and during their work-outs.

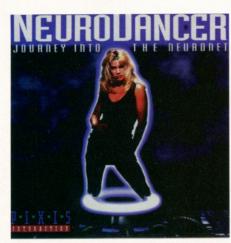

Many will undoubtedly find the most enjoyable aspect of all to be the attractive "hostess" in a black leather mini. She rewards interactive viewers who answer her questions accurately with some pretty hot action of her own.

—JAY JACEY

NEURODANCER

PIXIS INTERACTIVE

The first time you slip behind the controls of *NeuroDancer*'s VidFONE to surf the NeuroNet, you real-

ize you're in for something special. The spectacular 3D graphics and the variety of options presented at the start of the game are im-

pressive. However, you need to approach the game with a bit of patience. It may take a while to find your way, but it's certainly worth the trip.

The premise behind the game is simple enough. You collect credits by navigating your OrbCAM through a labyrinth of sinister hall-ways. You can then use the credits to access the lovely Neuro-Dancers. This task is somewhat daunting initially. There is little or no indication of exactly what collecting credits means.

After you get the hang of grabbing the credits without having your OrbCAM destroyed—which happens if you stay connected to the credit dispenser for too long—the game begins to get interesting. The graphics, great gameplay, and original soundtrack create an excellent atmosphere for the incredibly beautiful women that earn their keep on the 'net. As your "hacking" skills improve, many

surly characters will provide you with guidance or criticisms in your quest for the NeuroDancers. The frequent messages, warnings, and commercial parodies are entertaining diversions between holotube sessions with the dancers. NeuroDancer is one of the few adult CD-Rom titles that uses adult entertainment to accentuate the game, instead of using the game to accentuate the graphic video. An R-rated title, NeuroDancer represents the best adult gaming has to offer.

MUSIC

WE KEEP HEARING that our home entertainment centers will revolve around our computers. In that case, this new CD by Arkansas based "alternative" rockers 2 Minute Hate could represent the brave new world of the record business, a direction more companies, new and old, explore every day. Putting Worm into a CD player gets you a pretty fair album of 11 tunes with dark psychedelic edges grafted to a grungy, cool modern pop rock, guitar band sound.

Tuck Worm into a CD-Rom caddy, stick it into a Mac, and you get a whole lot more. The easy set-up assumes that you've never used a QuickTime CD before. The program asks if you want the application set up and then does the job. The colorful interface

is graphically well done, although some of the icons get lost in the technicolor paisley swirls. With a couple of clicks of the mouse, you can play all the songs and read the lyrics; see interviews with all the bands members telling you what they play and giving a brief take on their personality; listen to interviews with fans of the band; tour lead singer/guitarist/frontman/producer Barry Boynton's home studio, look around the band's tour van and access video clips of the title track and two other tunes from the album as well as a live video of yet another tune.

In the century that the music business has been churning out recordings, they've become complacent.

worm

2-MINUTE HATE ARDENT RECORDS

Time was, all they had to do was record the music, press it up and put it out. This disc writes up on the wall, in large spray-painted letters, that people soon will demand more.

"If You're Interested In Increasing The Performance Of Your CD-ROM Drive. Look No Further Than d-Time 10" - PC Magazine, January 1995

"d-Time" is flexible and intelligent...it's a good alternative to buying a faster CD-ROM drive"

> **Charles Brannon** CD-ROM Today 11/94

d-Time" uses state of the art, patent pending technology to make your CD-ROM drive perform as fast as your hard disk. Access time is lowered considerably, and d-Time10 makes Full Motion Video clips flow more smoothly and more realistically. Now you can play the latest multimedia titles on any CD-ROM player with amazing speed!

d-TIME10 REALLY MAKES AN IMPRESSIVE DIFFERENCE! YOU'LL LOVE

- ▼ d-Time¹⁰ makes RAM based cache obsoletel ▼ d-Time¹⁰ builds an acceleration file on your hard disk, taking advantage of fast, inexpensive disk space
 - d-Time¹⁰ lowers seek times from minutes to secon
 - d-Time¹⁰ has an easy to use installation program, just set it and forget it
 - ▼ d-Time® makes all of your CD-ROM titles run super fast!!

Order Call 800-999-7995 or 201-783-3600 • Fax: 201-783-3686

THE NUMBER OF CD-ROM OWN-ERS has doubled annually for the past three years. The news media throws the term "multimedia" around like they used "communism" in the McCarthy Era. Yet very few maps help us navigate the relatively uncharted waters of multimedia tech support. Why does the video look like those old movies of Babe Ruth? Why is the sound either non-existent or loud enough to shatter glass? What the hell is a dynalink? What can be done to get the most out of your machine?

tech support

To paraphrase the Oracle of Delphi, "Know Thyself, Know Thy PC." I know you're going to say, "Awww, man! Homework on the first day?", but your first step towards the Nirvana of multimedia is running the Windows Tutorial. The answers to many tech support questions are right there on your hard drive. Also, it will make any techies' job easier if you can get around in Windows before you try to have him walk you through a problem.

Perhaps the most neglected tool in the fight for multimedia satisfaction is the (hold on to something) DOS prompt. Done screaming with primal fear yet? That's right, back out of Windows and stare down the steely-eyed little C:\>. . . Pretty scary looking, huh? Time to change your mind. Repeat after me: The DOS prompt is my friend. . . The DOS prompt is my friend. A couple of utilities stored in there will improve your system performance, guaranteed.

First type MSD at the C:\> prompt. This gives you a run down of your system, details like how much available memory you have and what interrupts your system uses. Next, run ScanDisk by simply typing SCANDISK at the C:> prompt. ScanDisk will ask you if you want it to perform a surface scan. Unless you get a ton of Read Errors or Write Errors, you don't need to. ScanDisk takes an up close and personal look at your hard drive, fixing anything that has gone awry. Next, type in DEFRAG. This utility will optimize your hard drive by scanning for fragmented files, and rewriting them to optimum locations on your drive. Just select the letter that identifies your hard drive (probably C) and optimize. DOS will do the rest.

Finally, run MemMaker, DOS's built in memory manager. Just type in MEM-MAKER and it will scan your system and set the optimum memory configuration. It will then display a three-column table showing how much of a difference it made. The largest executable program you can run should show dramatic improvement.

You can find more information on these utilities in your DOS manual or any of the DOS-help books available on the market. If you do need to call a publisher for technical support, have a print out of your "config.sys" and "auto exec.bat" files on hand. Know your sys continued on page 80

To run a CD-Rom clearly, sometimes you have to open the hood and tinker with the DOS engine.

Don't forget to ask around, as well. As more and more people gain access to the Internet, you'll have more human resources to draw on—and you'll get to know more of the people that you'll see posting to newsgroups and e-mail lists you've subscribed to. Don't worry about being a "newbie"—we were all new to this once.

Help

continued from page 77

tem configuration (which you learned by running MSD). Make a note of any error message that your computer gives you. It will help the tech identify the problem. Have fun learning about what your computer can do. Check things out and try everything. If you make a back-up before you start messing around, you will not hurt anything unless you pour water on your CPU.

Here are some solutions to common Multimedia problems :

Q: Every time I try to run a CD, I get an error message that says "Call to an undefined Dyna-link", or "Not a QuickTime Sprite". What gives? — Tony B. Portland, OR

A: This error is caused by trying to run a CD that uses QuickTime v1.x after v2.0 has been installed. Titles such as Space Sirens (PIXIS Interactive) and The Star Trek Technical Manual use QuickTime v2.0. These titles now come with an uninstaller.

• Type (source drive):\QTIME\ setup.exe

- Choose 'Local' installation
- Choose the 'Remove' option.

This will ensure that only one version of QuickTime is running on your system. The other solutions are to either re-load your Windows system disks or install QuickTime v2.1, which is downwardly compatible. This version can be found on *GO Digital* magazine (Electromedia)

Q: It seems to take forever for my computer to get information from my CD-Rom drive. Is there anyway I can speed it up without getting a triple or quad speed drive? —Alex T. Maybrook, NY

A:One excellent way to reduce your CD access time is to install an accelerator, such as Ballard-Synergy's D-Time. This program "learns" your CDs so your computer can access frequently used information at a speed more reminiscent of your hard drive than a CD-Rom. You can configure the install to keep it from using to much of your hard drive space.

If you have a question for us, you can fax it to 201.783.3686, or e-mail it to IQMag@aol.com. We cannot respond to all your questions, but we will get to as many as we can.

Interactive Pleasure

continued from page 33

out of it. I wasn't necessarily convinced but bottom line, I had nothing to lose. I said, 'Let's do it,' even though I had no idea what they were talking about."

Soon, he could interact with the best of them. Butt's brought the highly unique, arousing style that makes his work something special in the world of adult video to his interactive escapades.

"Any schmuck can pick up a camera," our hardcore hero asserts. "Programming a CD-Rom, with all the interactive possibilities, can be a bit tedious. I've set up my video styles to

the point where I don't demand great acting. With the CD-Rom format, things are not quite as free. It demands more of the girls because they have to come across with specific, scripted responses."

While Shane agrees that playing the same scene several different ways can become tiresome, she adds, "I'm basically playing myself. I get to act like a big geek in front of the camera and everyone likes it," she laughs.

"The interactive market has definitely supported the product so far," Butts marvels. "The only thing that comes close to what we're doing is *Virtual Valerie* and the Pixis Entertainment stuff. But I feel what we're doing, in terms of the amount of interactivity we have, is way ahead."

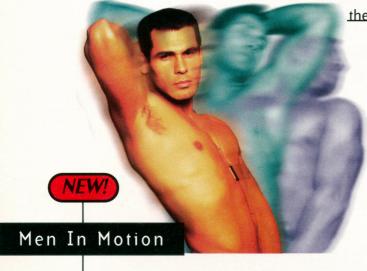

Seymore's mother, Lila Glasser, agrees enthusiastically. Glasser, who keeps the business in the family, manages the mail order element of Butts' empire. She claims, "I was surprised when I found out what Seymore was doing. He had never shown any leanings toward photography, but I feel he's doing something creative in the adult film business. It doesn't bother me. He's making an honest living and that's all I care about."

Mother Butts reckons that Seymore's interest in the adult film world might be a by-product of a very open upbringing. "My generation grew more open minded about sex and adult videos. We didn't hide it. We don't make things out to be smutty or disgusting. In our household sex was a natural thing, not a no-no."

Seymore Butts' future frolics include more video and interactive debauchery. From his position behind the camera he expects to capture more funny moments, as well.

"Sometimes people fart," he smiles. "Other unexpected things happen. Certainly when you're having people perform sex in front of you there is the possibility of life's little embarrassing moments."

the Best in Adult Interactive CD-Rom Entertainment

the First All-Male INTERACTIVE GAME on CD-Rom!

They say that a HARD MAN is GOOD to find. Well, if you love MEN, then **Men In Motion** is a GREAT find, several times over!

It's a matter of ecomonics - everything has a price and how much you see depends on how much you spend. But with HOT New York male strippers to tip, rooms full of things to purchase, a limited amount of cash and a greedy, money-grabbing clerk behind the counter, it's up to you to see to it that you spend your money wisely!

So explore the world of Men In Motion, the most interactive male stripper game on CD-Rom. But keep an eye on your money, because the men on stage may not be the only ones losing their shirts!

all Rom Antics disks are MAC & IBM

DONNA COE

Yes, Virginia,

there is a

silicone valley.

EROTICA ON CD-Rom. What an idea! Using the latest in consumer information technology to play porn. Having heretofore only utilized my accessory for higher educational and spiritual matters, I was anxious to sully my pristine slot with lower chakra grunge. In short, I could hardly wait! So I slid in *Digital Erotic Sampler*, volume 2 by Pixis and A Taste

fondling her bodacious tatas.

Come on, guys. Women spend lots of time and money on make-up, hair stuff, clothes and perfume. Is that all it takes? A picture of a broad being groped by some other man? Say it ain't so. If that was the case, the traditional Playboy centerfold would feature a naked nubile model casually perched astride an outdoor

breasts of future past

of Erotica, edition 2 by New Machine, and watched them come on my computer screen.

Can it be true? Is it possible that the Yanni-like music accompanying today's on-screen couplings has replaced the tinny faux jazz background music of the 1950s? And that the current parade of perkily molded breasts, as immobile as a reactionary Republican, is now subbing for bosoms that were once real, fleshy and floppy? Yes, Virginia, there is a silicone valley.

One particular interactive image caught my fancy, so to speak. The scenario: A lone woman stands before the camera clad in a two-piece bathing suit. A pair of men's hands enter the screen and approach her breasts. The idea is they're YOUR hands. Lucky you are vicariously

barbeque grill (clad in an appropriately skewed chef's apron) with a pair of hands obscuring her perfectly airbrushed breasts. Even Larry Flynt wouldn't buy that for a dollar. Hef's certainly clever enough to have figured that out. But he knew better.

He discovered real men want to look at women unimpeded by the presence of another guy's hairy appendages. . . unless, of course, that's what turns that particular dude on, in which case, tune into Jerry Springer.

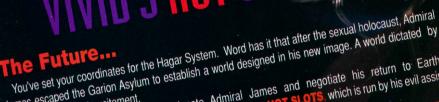

Hey, wait a minute—a cyber-talk show! Now, there's an interactivity we could all get into. Forget sex. We'll dispel our coital tension like they do on TV—by talking incessantly about ourselves.

In fact, just talking about talking about it makes me want to get a cigarette.

Dear Reader,

There's so much entertainment software coming out on CD Rom, we thought you might like some help sorting things out. That's why we created *Interactive Quarterly*, America's first Adult CD Rom Magazine.

Interactive Quarterly features plenty of reviews, a Buyer's Guide, and stories on the lifestyles and creative breakthroughs of the stars and star-makers in the world of adult interactive entertainment.

We hope you like it. If you do, there is a terrific offer on page 53. For only \$9.95 you'll get a one year subscription and an adult CD Rom sampler of your choice.

Either way, we'd love to know what you think of our magazine, so please drop us a line.

Sincerely,

Theresa Reilly

Circulation Director
